Satellite Data Connectivity for Corporate

SERVICES

Bandwidth Options

You can choose from the bandwidth availability options shown in the table according to your requirements. You can connect at very reasonable cost without any loss of quality.

Dedicated Bandwidth

The dedicated bandwidth can be divided/shared between the offices or customer locations as shown in picture below.

Satellite Coverage and Equipment

The SimbaNET VSAT solution offers seamless trans-oceanic and trans-continental coverage through the NewSkies global satellite fleet (NSS-7). SimbaNET has access to dedicated and guaranteed bandwidth on various communication satellites. The C-Band footprint will cover four continents: Europe, Africa, North and South America. SimbaNET is offering a Remote Satellite terminal including a 1.8/2.4 meter dish for this solution.

NSS-7 C-Band

Bandwidth Availability with Satellite Connection

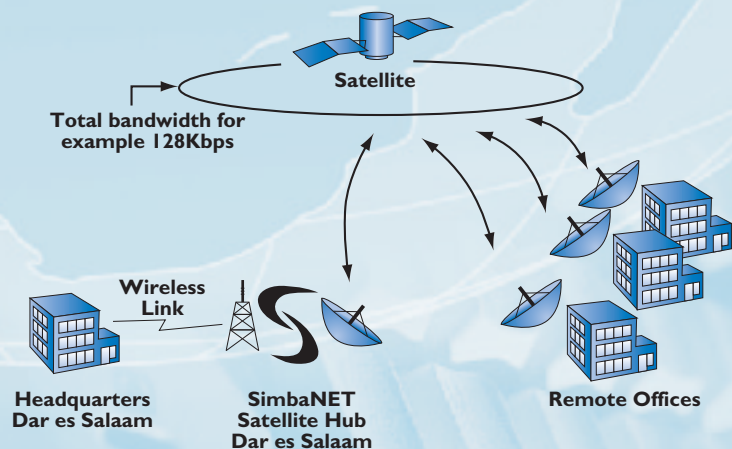

Dedicated Bandwidth (Kb/s)							
	64Kb/s*	128Kb/s	256Kb/s	512Kb/s	1024Kb/s	1536Kb/s	2048Kb/s
Available	x	x	x	x	x	x	x

*64Kb/s is also available as a shared option
